Claims 7-29, and 39 have been canceled by the amendment dated October 23, 2003.

Claims 1-6, and 30-38 are pending.

Applicant's response has been considered by the examiner. Mainly, the clarification of the restriction response is correct, and the response to the objection is found persuasive. However, the ODP issue remains pending because while applicant indicates in the response that the Terminal Disclaimer has been filed, the TD has not been filed at the time this action is prepared.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-6, 30-38 remain rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-20 of US 5,994,128, claims 1-14 of US 6,306,652.

Although the conflicting claims are not identical, they are not patentably distinct from each other because: The examined claims encompass a method of employing adenovirus sequences expressing E1A and E1B but not protein IX for the making of RCA-free replication defective adenovirus carriers. Given that claims 1-20 of the '128 patent and claims 1-14 of the '652 patent are drawn to essentially the same concept of utilizing a system comprising a primary cell consisting essentially of adenovirus sequences expressing E1A and E1B but not protein IX for the making of RCA-free replication defective adenovirus carriers, the examined claims and the claims from either the patent are obvious variants of one another.

No claim is allowed.
